

Medical Crossword End-User Documentation

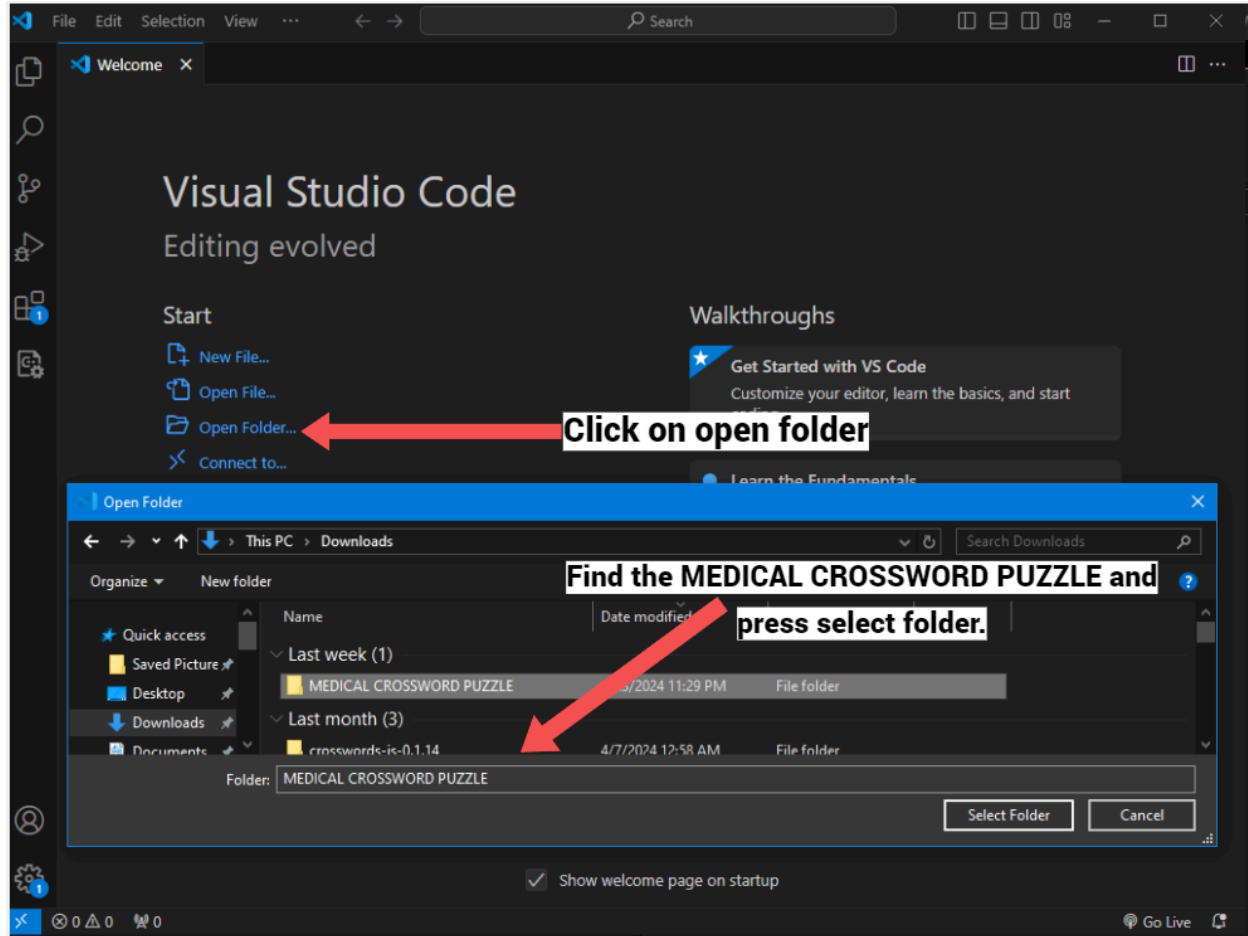

Medical Crossword project is a software application that aims to be easy access through the web to hone your memorization of medical terminology by playing and solving crosswords with medical terminology definition to solve with its corresponding word. This HTML5 puzzle game / web app is designed to be viewed from mobile devices, so you can see a navigation drawer that can be opened by tapping on the hamburger button. Open the navigation drawer to choose between 3 words or 5 words. To fill the crossword, I know it's a little bit strange, that you must click any box to show a virtual keyboard, then you can tap any of the letters of your choice. Let's start on how to navigate Medical Crossword website

Accessing the site

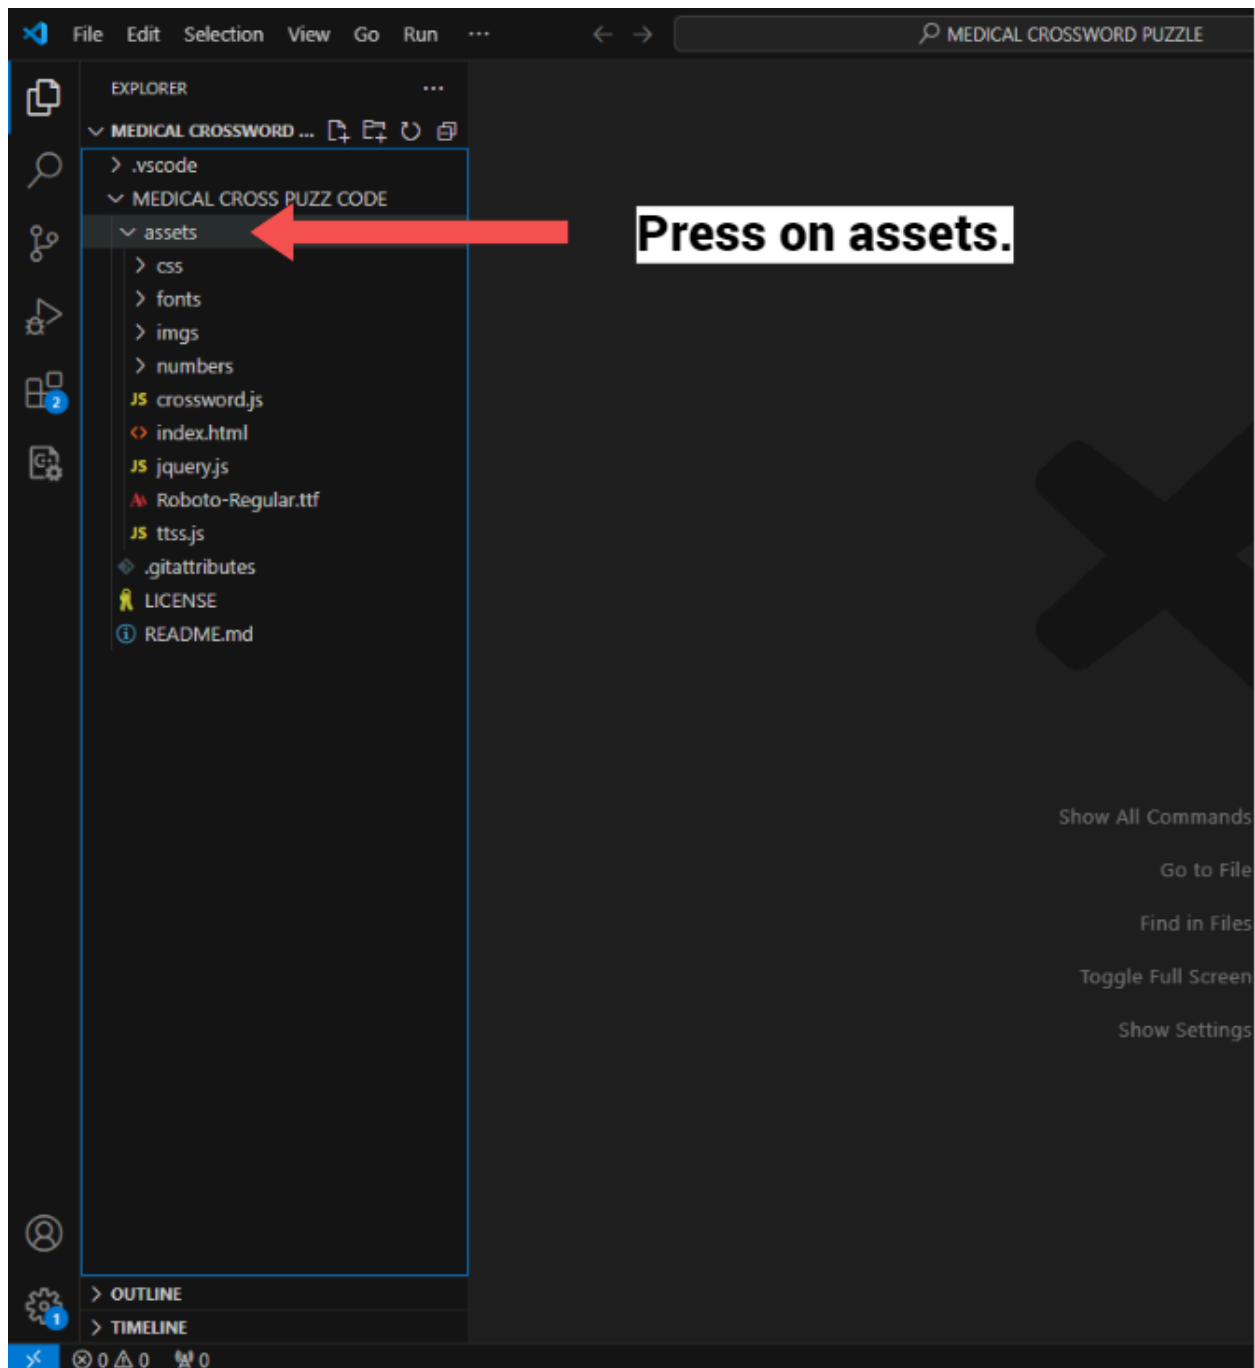

As it is right now to access the site you will have to open visual studio code or any code editor.

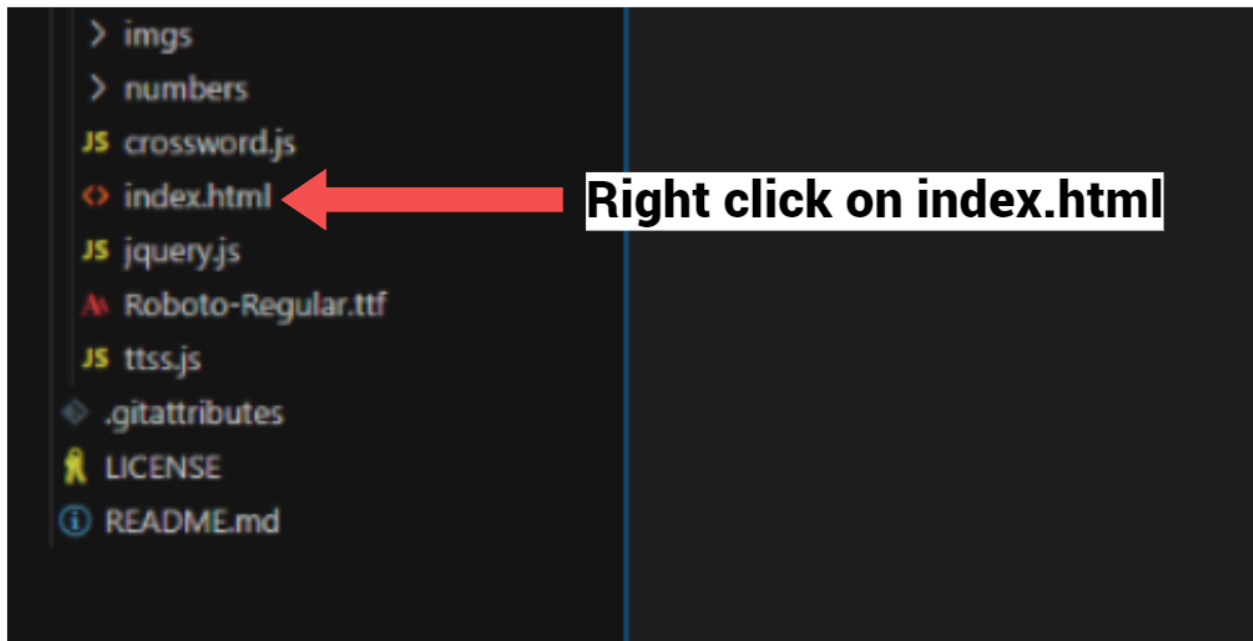

Click on the open folder and from there find the **MEDICAL CROSSWORD PUZZLE** folder and press on file then press select folder.

Navigate and find the subfile assets where the source code is located.

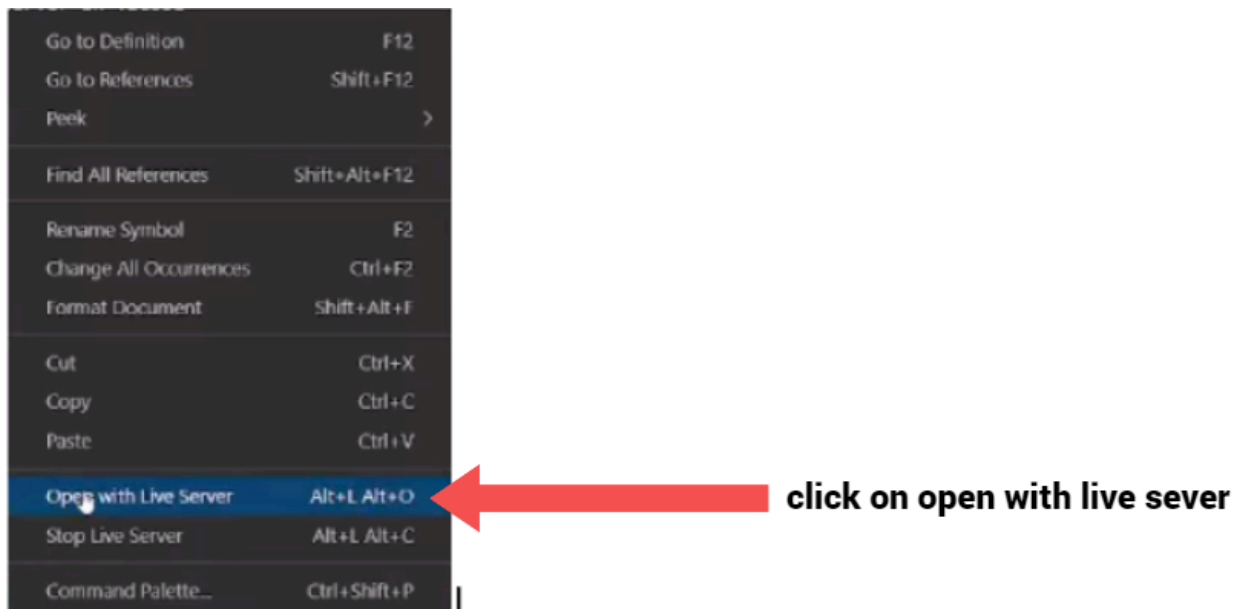

Look for index.html and right click to see more options.

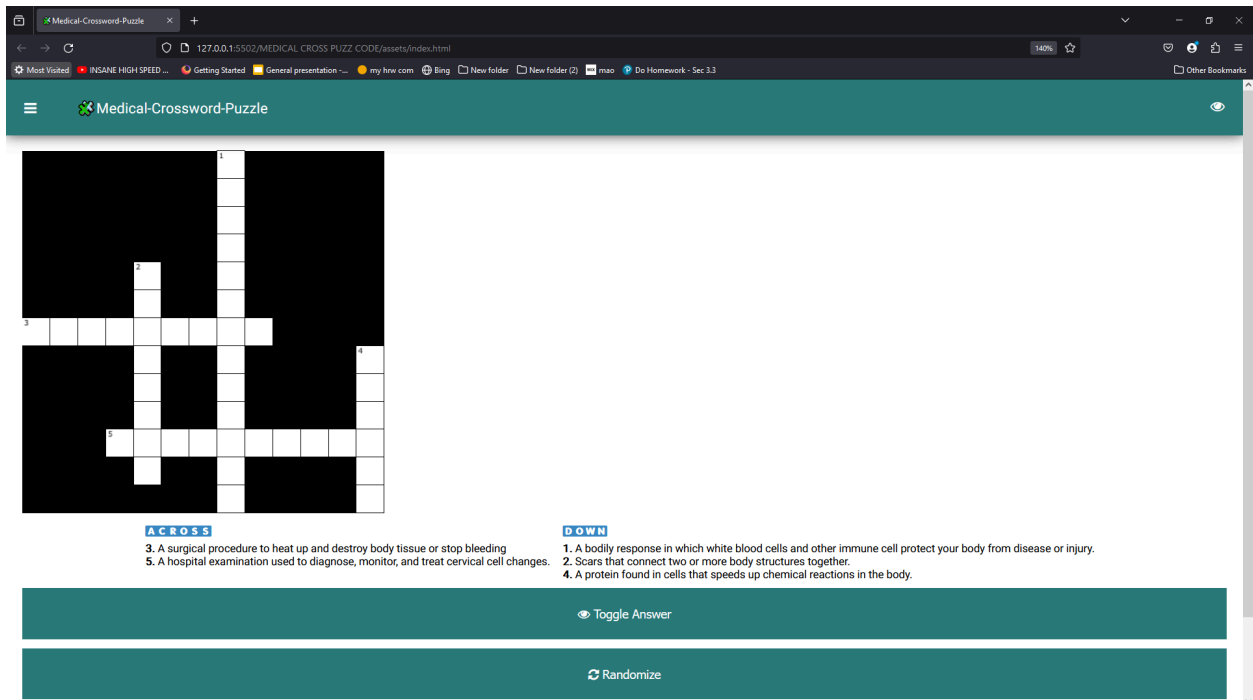

Open with a live server or any other extensions that allows you to run applications in a web browser. If you do not have a live server extension here is a video tutorial on how to use and install the live server extension.

📺 [VsCode Tutorial: How to use Live Server and view updates right in VsCode without using ...](#)

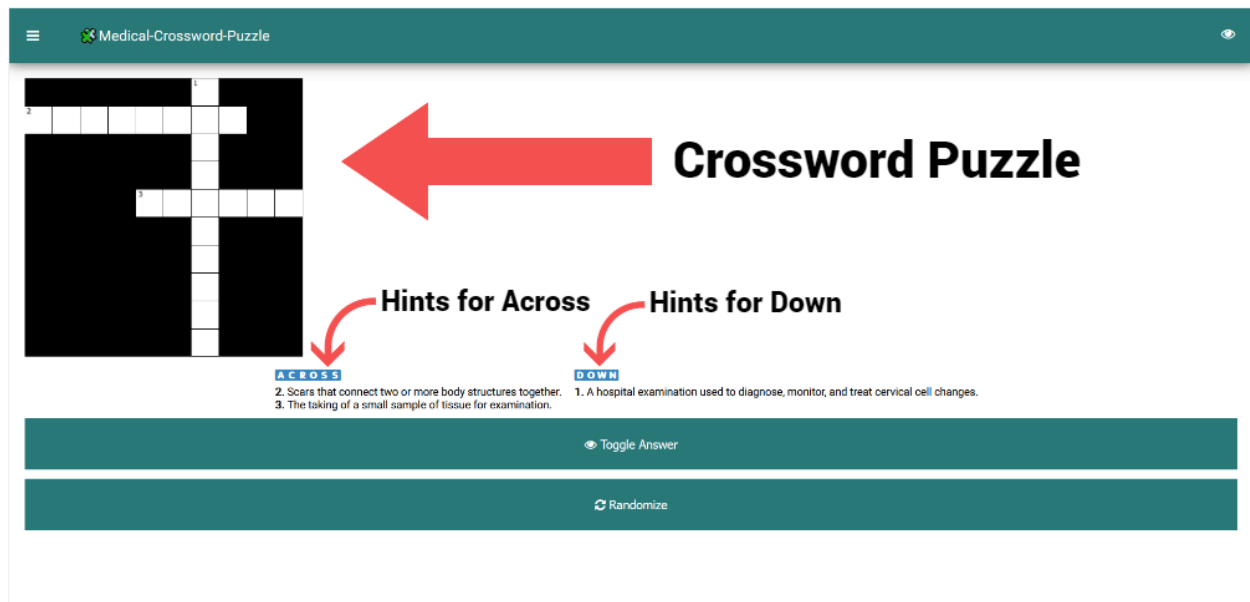

Once open the program, it would then prompt the webpage.

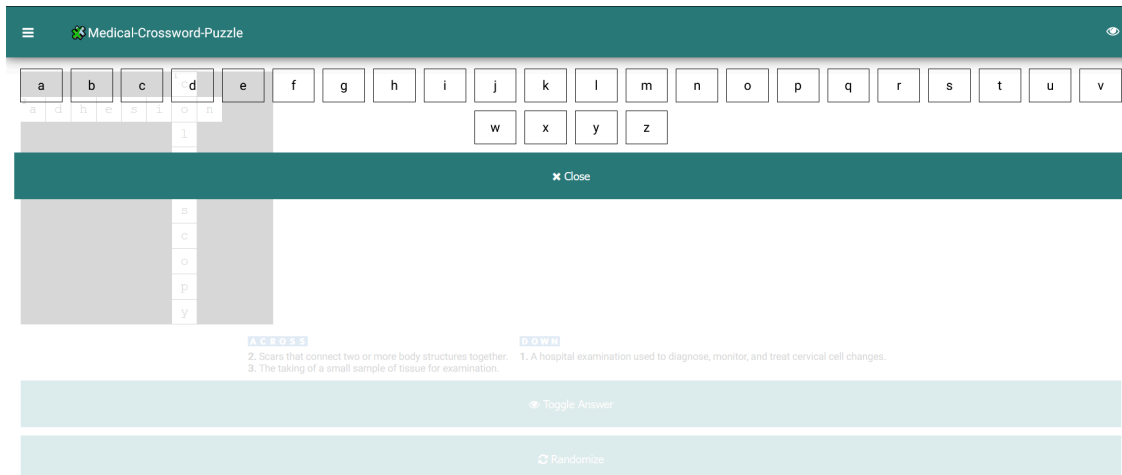

User Side

Crossword Page

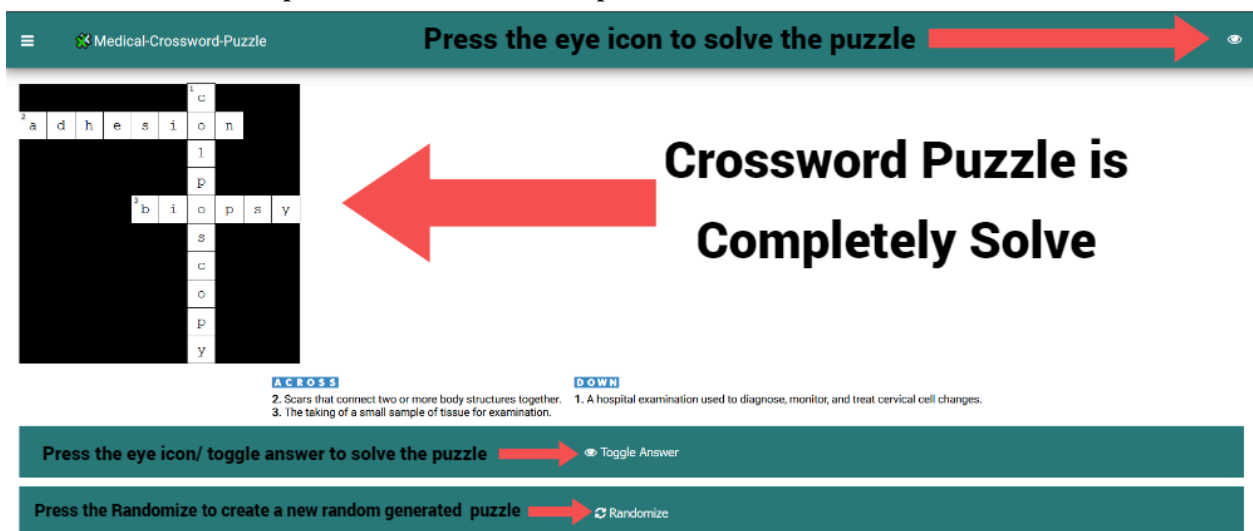

First let's talk about the crossword page. The crossword page contains the main crossword puzzle which includes hints from the definition of the medical terminology that the admin has created that are currently used to test medical students.

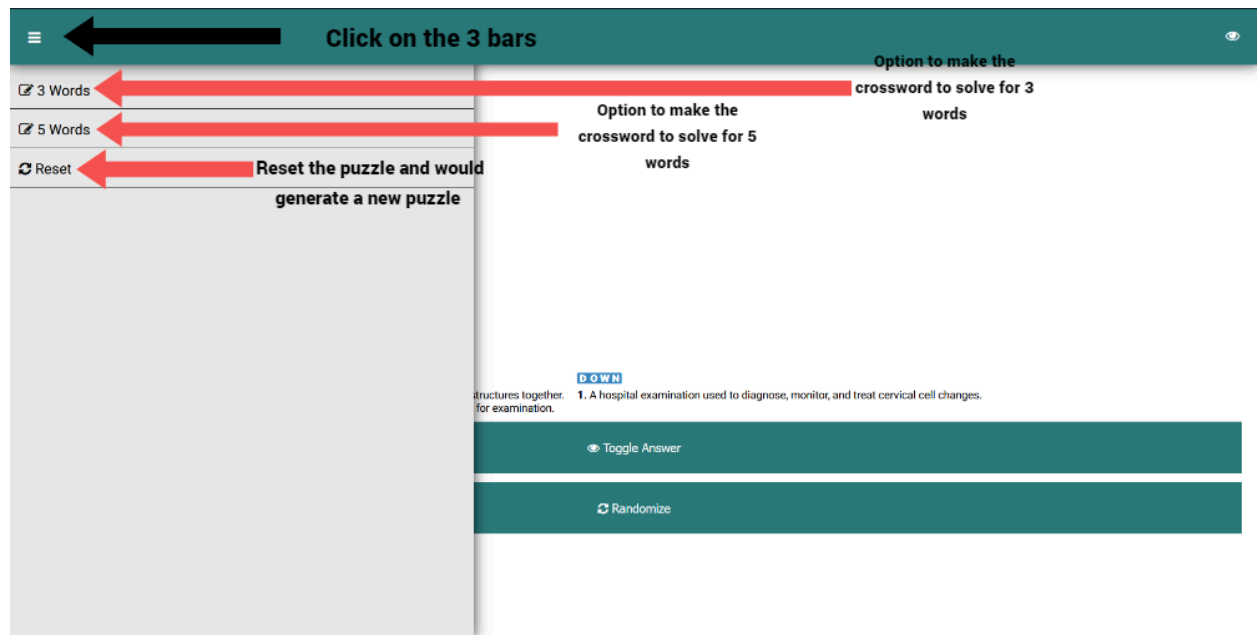

You must click any white box to show a virtual keyboard, then you can tap any of the letters of your choice to solve the word that is down or across.

You are also able to click toggle answer which shows the answer of the crossword puzzle or click the eye in the top right corner to solve the crossword puzzle and as well a option click on randomize which randomizes the pattern of the crossword puzzle.

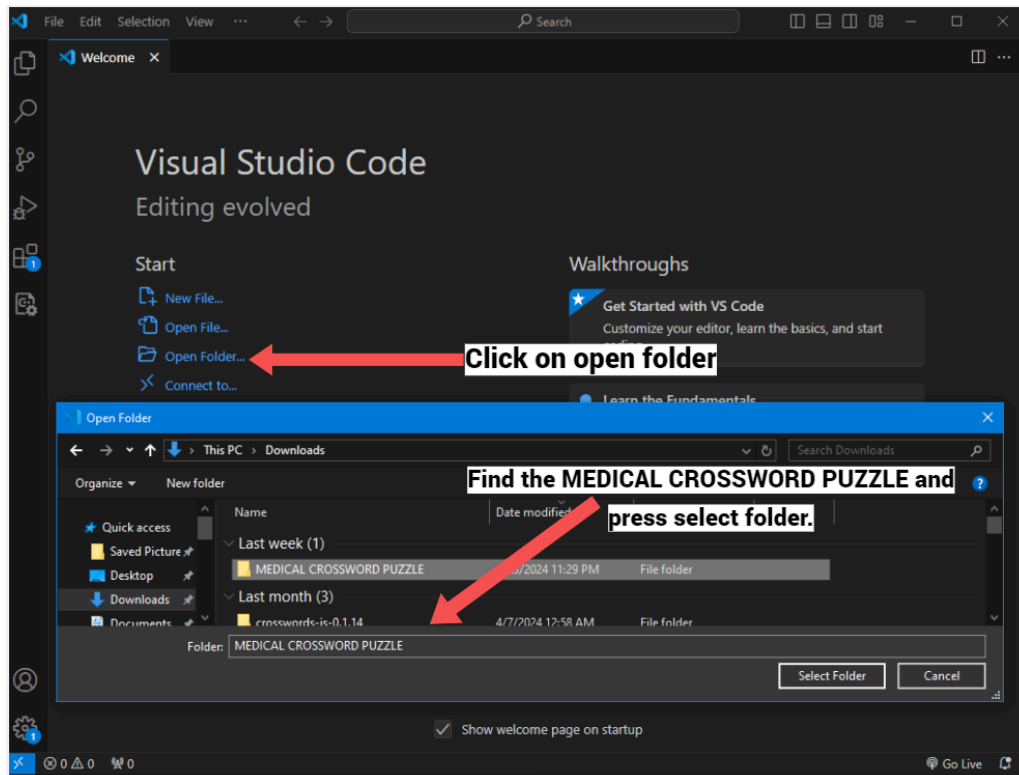

As you can see when you enter the site there in the top left corner 3 bar images for the options to change for 5 words or 3 words and as well reset the crossword puzzle.

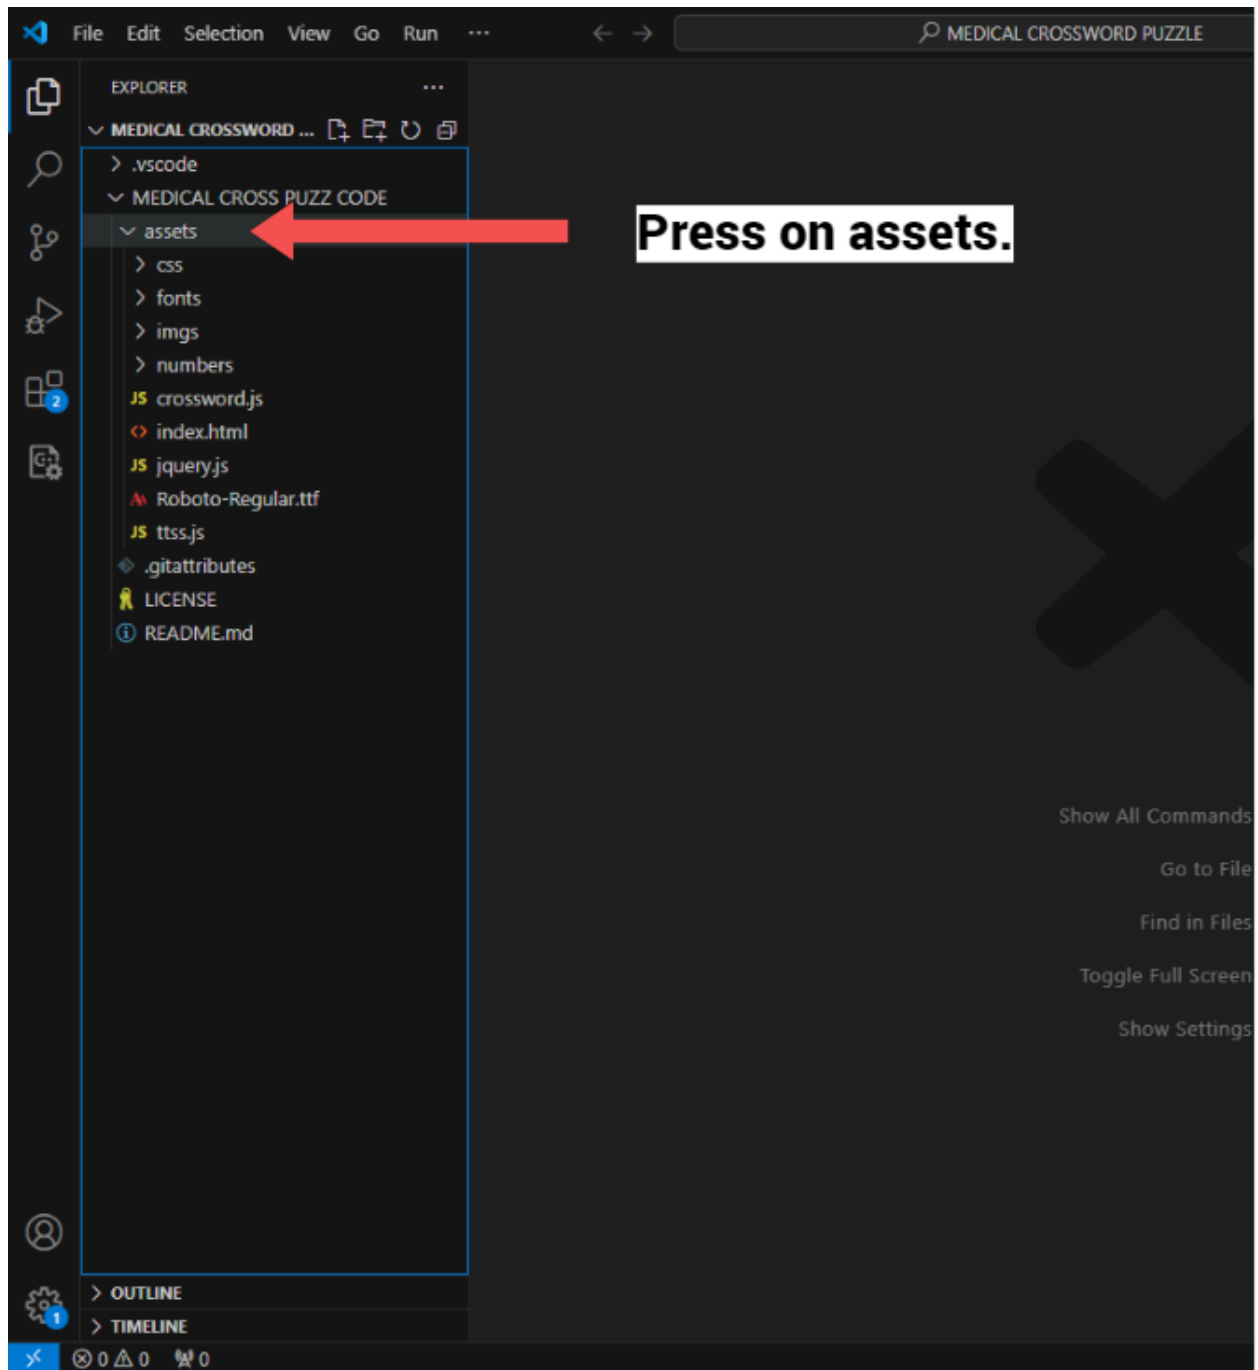

Admin Side

To make changes you have to use visual studio code or any code editor. You can add on the list of words or remove words. As well add or remove clues as defined below the word.

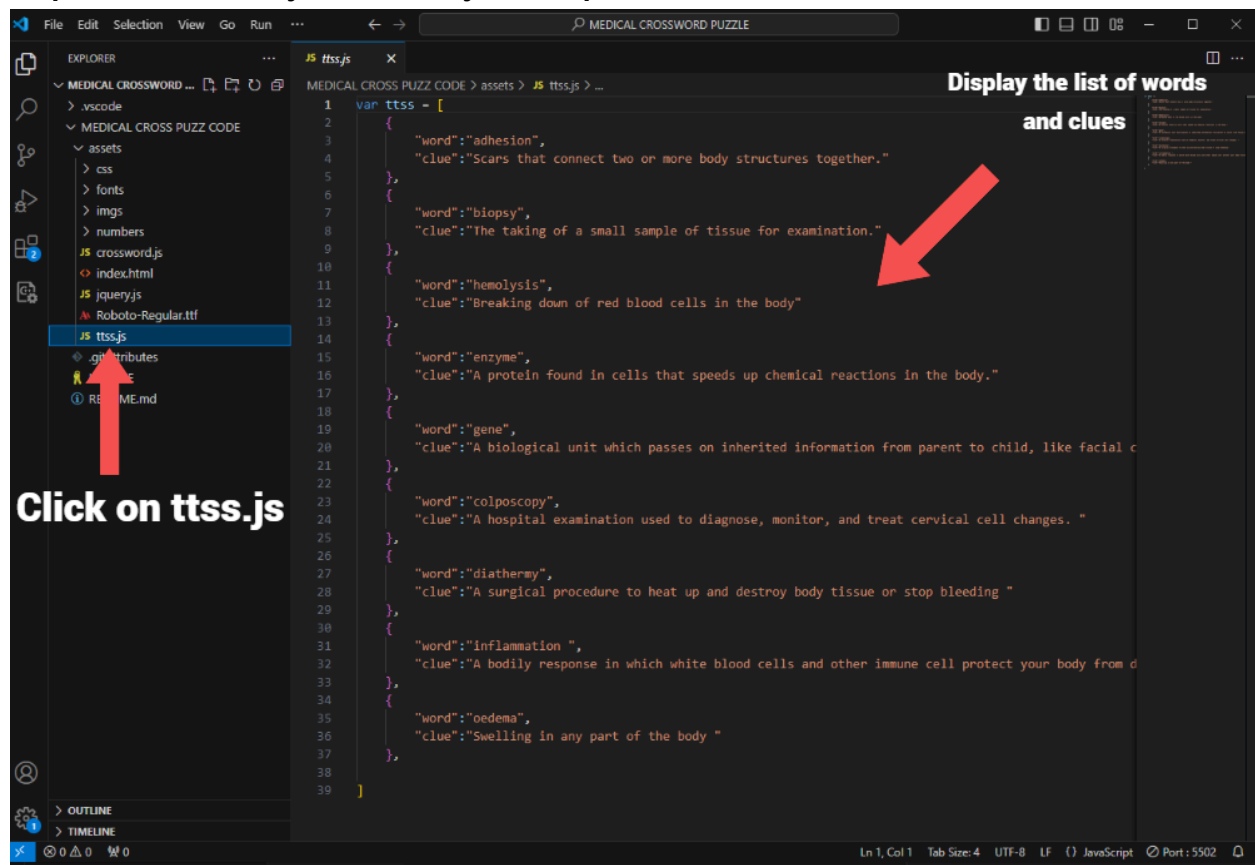

Step 1: open visual studio code and open the MEDICAL CROSSWORD PUZZLE file.

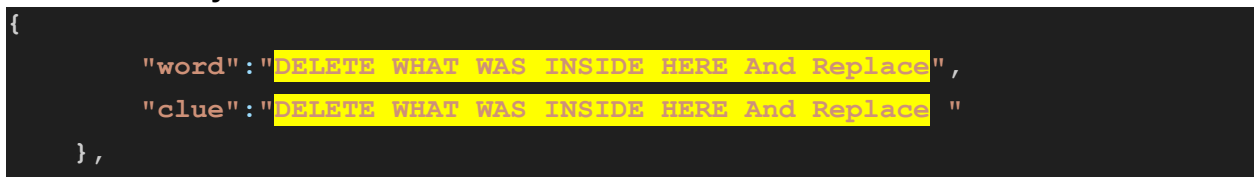

Step 2: click on assets

Step 3: click on ttss.js and show java script code for the list of words and clues.

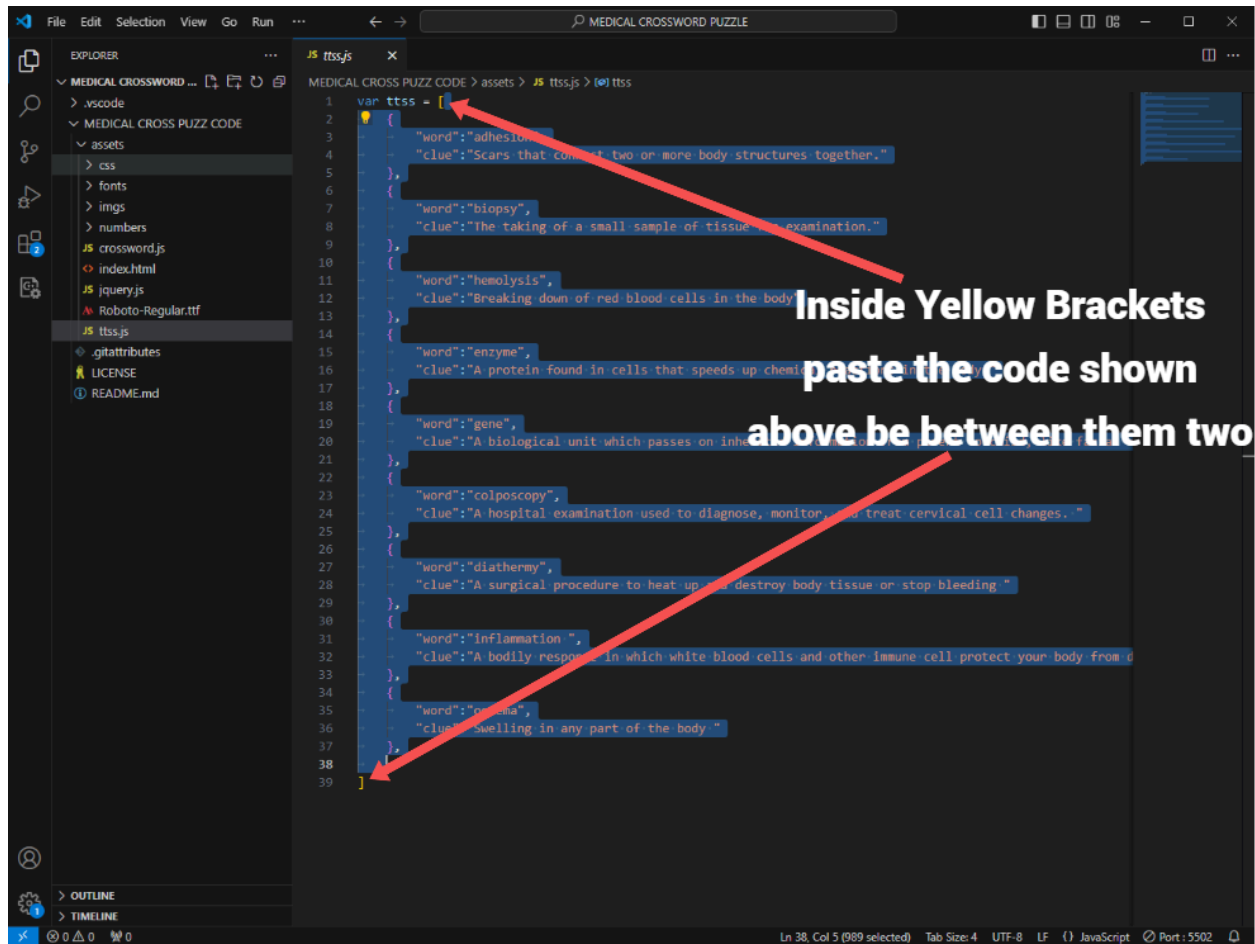

Step 5: Remove by deleting the word or clue in the yellow highlighted. As well replace what was with your own word and clue.

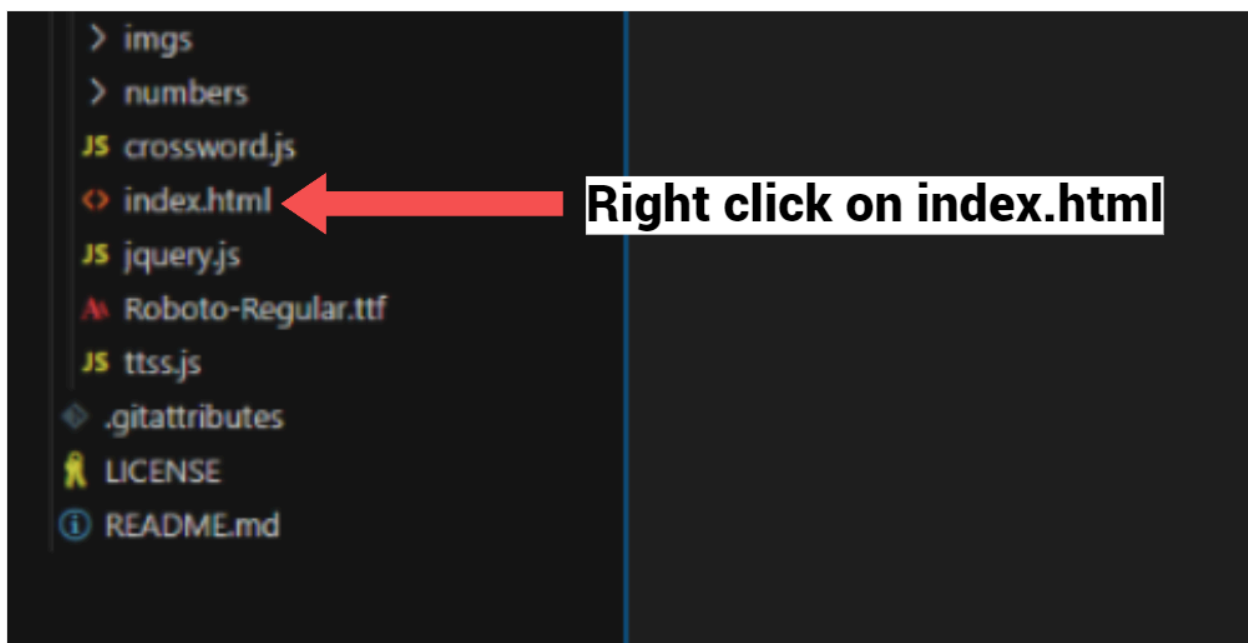

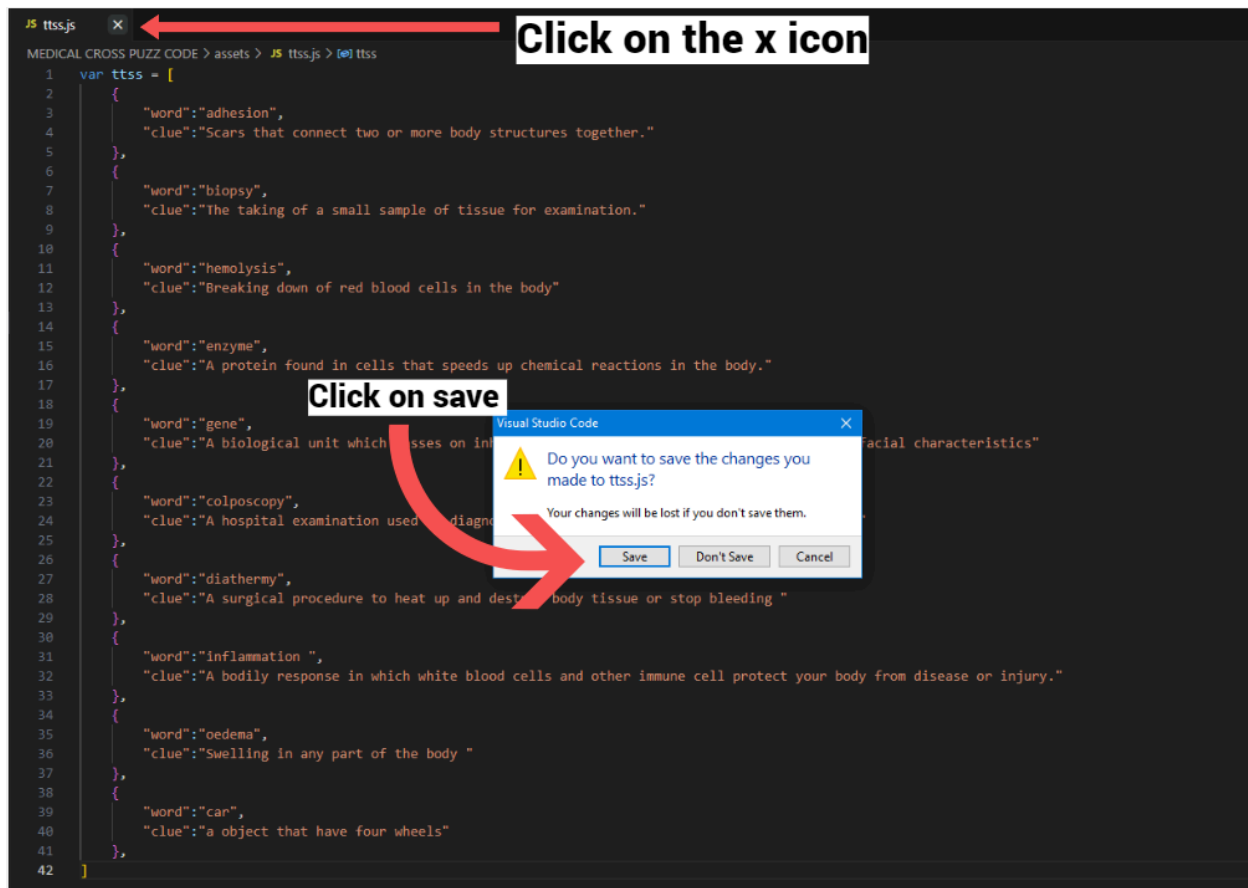

Step 6: Adding more words with its corresponding clues by copy and paste the code below and add between the [].

```
{  
  "word": "ADD Word INSIDE HERE",  
  "clue": "ADD Word INSIDE HERE"  
},
```

Step 7: Save the changes by closing the java script and pop up a small window asking whether or not to save. Click save and open the live server to play test out the removal or addition of words and clues.
